Emergency Services Reduction	$400M	Reduced housing court, police, EMT calls for housing-insecure households
Health Cost Reduction	$600M	Housing stability reduces chronic disease, ER visits, hospitalizations
Educational Outcomes	$800M	Higher graduation rates, reduced special education costs, increased lifetime earnings
Tax Base Increase	$350M	Increased property values, commercial activity in stable neighborhoods
TOTAL SOCIETAL BENEFIT	**$8,937M**	

Calculation: $8,937M √∑ $1,449M = **6.2:1 full societal ROI**

Comparison: TCAP vs. Alternatives

Program	Total 10-Yr Cost	Outcomes per HH	Cost Per HH	ROI	Permanent Housing
Emergency Rental Assistance (Status Quo)	$5,200M	Temporary housing only	$58,000	-100% (perpetual cost)	NO
Mixed-Income Development	$3,100M	30 units per 100 invested (30%)	$80,000/unit	0:1 (no permanent equity)	30 years
TCAP Cooperatives	$1,449M	38.7K households served	$37,500	6.2:1	YES (99+ years)
NYCHA (Public Housing)	$1,000M + $32B backlog	172K served (but under-maintained)	$5,800	? (maintenance crisis)	YES (but underfunded)

Key Finding: TCAP delivers:
- ,úÖ Lowest cost per household
- ,úÖ Highest ROI
- ,úÖ Permanent affordability guarantee
- ,úÖ Tenant wealth creation
- ,úÖ Democratic control

12.2 Scenario Comparison: 10-Year Outcomes

Scenario 1: Status Quo (Continued Rental Assistance)

Assumption: Continue current spending ($5.2B/year)

10-Year Outcome:

Metric	Value
Total spending	$52.0B
Households served (annual average)	895,000
Permanent housing created	0
Tenant wealth created	$0
Evictions	400,000+
Homeownership gap closure	0 pp
Intergenerational impact	PERPETUAL POVERTY

Sustainability: Unsustainable (budget crisis ongoing, homelessness increases despite spending)

Scenario 2: Mixed Approach (Rental Assistance + New Development)

Assumption: Reduce rental assistance 20% ,Üí $4.16B; invest 20% ($1.04B) into mixed-income development

10-Year Outcome:

Metric	Value
Total spending	$46.8B
Permanent units created (development)	~13,000 (20% of investment)
Households in emergency assistance	~716,000
Tenant wealth created	~$0 (mixed-income residents)
Evictions	~320,000
Homeownership gap closure	~0.5 pp
Intergenerational impact	Modest improvement

Sustainability: Moderate (development pipeline slow, affordability temporary after 30 years)

Scenario 3: Full TCAP Deployment (Proposed)

Assumption: Reallocate 27% of subsidy budget ($1.45B) to TCAP; continue 73% as rental assistance

10-Year Outcome:

Metric	Value
Total spending	$47.5B (same as Scenario 2)
Cooperatives created	353 buildings
Households in permanent ownership	38,700
Households in rental assistance	~857,000
Tenant wealth created	$1,236M
Evictions (TCAP portion)	~600 (99% reduction in TCAP buildings)
Homeownership gap closure	4-6 pp
Intergenerational impact	PERMANENT WEALTH ACCUMULATION

Sustainability: Highly sustainable (declining subsidy dependency, community wealth builds)

Scenario 4: Expanded TCAP (Future Vision)

Assumption: Over time, expand TCAP to 50% of subsidy budget ($2.6B/year)

20-Year Outcome (Years 1-20):

Metric	Value
Cooperative buildings created	700+
Households in permanent ownership	90,000+
Households in rental assistance	Declining annually
Total tenant wealth created	$3.0B+
Evictions (TCAP portion)	<1,000/year (99%+ reduction)
Homeownership gap closure	8-12 pp
Intergenerational impact	SUBSTANTIAL WEALTH CORRECTION

Sustainability: Perpetual (subsidy dependency virtually eliminated for TCAP participants)

12.3 Break-Even Analysis

Question: At what point does TCAP investment break even against status quo?

Calculation:

Year 1:
- TCAP investment: $45M
- Compared cost (if same households stayed on rental assistance): $52M/year
- Break-even: Year 1 (TCAP already cheaper)

Year 5:
- Cumulative TCAP investment: $397M
- Compared cost (status quo 5 years): $2,600M
- Break-even: Year 1 (perpetually positive)

Year 10:
- Cumulative TCAP investment: $1,449M
- Compared cost (status quo 10 years): $5,200M
- Cumulative savings: $3,751M
- Payoff achieved: Year 1 (and compounds annually)

Key Finding: TCAP breaks even immediately (year 1) and creates cumulative savings every year thereafter.

A: Master report is 40,000 words (~2-3 hours to read fully). Executive brief is 2,500 words (15 minutes). You choose depth.

Q: Can I modify these materials?
A: Yes. All files are text-based, easy to edit. Adapt as needed for your audience.

Q: What if I have questions about the policy?
A: All answers are in the materials. Every claim is cited. Every assumption is explained. Everything is documented.

Q: How do I know this will work?
A: 40+ years of TOPA (DC), 30 years of COPA (SF), 150+ years of Swiss cooperatives. The model is proven.

Q: What's the first step?
A: Read the master report. Understand the model. Then brief your team. That's it.

Emergency Services Reduction	$400M	Reduced housing court, police, EMT calls for housing-insecure households
Health Cost Reduction	$600M	Housing stability reduces chronic disease, ER visits, hospitalizations
Educational Outcomes	$800M	Higher graduation rates, reduced special education costs, increased lifetime earnings
Tax Base Increase	$350M	Increased property values, commercial activity in stable neighborhoods
TOTAL SOCIETAL BENEFIT	**$8,937M**	

Calculation: $8,937M √∑ $1,449M = **6.2:1 full societal ROI**

Comparison: TCAP vs. Alternatives

Program	Total 10-Yr Cost	Outcomes per HH	Cost Per HH	ROI	Permanent Housing
Emergency Rental Assistance (Status Quo)	$5,200M	Temporary housing only	$58,000	-100% (perpetual cost)	NO
Mixed-Income Development	$3,100M	30 units per 100 invested (30%)	$80,000/unit	0:1 (no permanent equity)	30 years
TCAP Cooperatives	$1,449M	38.7K households served	$37,500	6.2:1	YES (99+ years)
NYCHA (Public Housing)	$1,000M + $32B backlog	172K served (but under-maintained)	$5,800	? (maintenance crisis)	YES (but underfunded)

Key Finding: TCAP delivers:
- ,úÖ Lowest cost per household
- ,úÖ Highest ROI
- ,úÖ Permanent affordability guarantee
- ,úÖ Tenant wealth creation
- ,úÖ Democratic control

12.2 Scenario Comparison: 10-Year Outcomes

Scenario 1: Status Quo (Continued Rental Assistance)

Assumption: Continue current spending ($5.2B/year)

10-Year Outcome:

Metric	Value
Total spending	$52.0B
Households served (annual average)	895,000
Permanent housing created	0
Tenant wealth created	$0
Evictions	400,000+
Homeownership gap closure	0 pp
Intergenerational impact	PERPETUAL POVERTY

Sustainability: Unsustainable (budget crisis ongoing, homelessness increases despite spending)

Scenario 2: Mixed Approach (Rental Assistance + New Development)

Assumption: Reduce rental assistance 20% ,Üí $4.16B; invest 20% ($1.04B) into mixed-income development

10-Year Outcome:

Metric	Value
Total spending	$46.8B
Permanent units created (development)	~13,000 (20% of investment)
Households in emergency assistance	~716,000
Tenant wealth created	~$0 (mixed-income residents)
Evictions	~320,000
Homeownership gap closure	~0.5 pp
Intergenerational impact	Modest improvement

Sustainability: Moderate (development pipeline slow, affordability temporary after 30 years)

Scenario 3: Full TCAP Deployment (Proposed)

Assumption: Reallocate 27% of subsidy budget ($1.45B) to TCAP; continue 73% as rental assistance

10-Year Outcome:

Metric	Value
Total spending	$47.5B (same as Scenario 2)
Cooperatives created	353 buildings
Households in permanent ownership	38,700
Households in rental assistance	~857,000
Tenant wealth created	$1,236M
Evictions (TCAP portion)	~600 (99% reduction in TCAP buildings)
Homeownership gap closure	4-6 pp
Intergenerational impact	PERMANENT WEALTH ACCUMULATION

Sustainability: Highly sustainable (declining subsidy dependency, community wealth builds)

Scenario 4: Expanded TCAP (Future Vision)

Assumption: Over time, expand TCAP to 50% of subsidy budget ($2.6B/year)

20-Year Outcome (Years 1-20):

Metric	Value
Cooperative buildings created	700+
Households in permanent ownership	90,000+
Households in rental assistance	Declining annually
Total tenant wealth created	$3.0B+
Evictions (TCAP portion)	<1,000/year (99%+ reduction)
Homeownership gap closure	8-12 pp
Intergenerational impact	SUBSTANTIAL WEALTH CORRECTION

Sustainability: Perpetual (subsidy dependency virtually eliminated for TCAP participants)

12.3 Break-Even Analysis

Question: At what point does TCAP investment break even against status quo?

Calculation:

Year 1:
- TCAP investment: $45M
- Compared cost (if same households stayed on rental assistance): $52M/year
- Break-even: Year 1 (TCAP already cheaper)

Year 5:
- Cumulative TCAP investment: $397M
- Compared cost (status quo 5 years): $2,600M
- Break-even: Year 1 (perpetually positive)

Year 10:
- Cumulative TCAP investment: $1,449M
- Compared cost (status quo 10 years): $5,200M
- Cumulative savings: $3,751M
- Payoff achieved: Year 1 (and compounds annually)

Key Finding: TCAP breaks even immediately (year 1) and creates cumulative savings every year thereafter.
